

MAYUR SHARMA

Lead Analyst | Media Mix Modeling Specialist | Customer Analytics | GenAI & LLM Applications | Analytics Consultant | Data-Driven Strategy & Optimization

Lead Analyst with expertise in Media Mix Modeling, Advanced Analytics, and Customer Analytics. Experienced across Media, Retail, FMCG, and pharma domains. Skilled in non-linear adstock model and Bayesian frameworks to measure media impact and optimize ROI, as well as churn, CLV, propensity, and segmentation modeling to drive retention and targeted marketing. Recently expanded into GenAI, building LLM-powered multi-agent and RAG-based analytics assistants using LangGraph. Adept at end-to-end project leadership, stakeholder consulting, and translating complex data into actionable business recommendations.

SKILLS

Media & Marketing Analytics:

Media Mix Modeling (MMM), Marketing ROI Analysis, Budget Optimization

Advanced Analytics & ML:

Predictive Modeling, Customer Analytics, Churn Prediction, Propensity Modeling, Machine Learning, Feature Engineering, Statistical Analysis, Econometrics, Generative AI (LLM, RAG, Multi-Agent Systems)

Delivery Management & Consulting:

Analytics Consulting, Stakeholder Management, Hypothesis-Driven Problem Solving, Mentorship & Team Leadership

WORK EXPERIENCE

Lead Analyst

Dentsu Global Services (DGS)

09/2024 - Present

Achievements/Tasks

- **Media Mix Modeling & ROI Optimization:** Designed and Developed non-linear adstock and saturation MMM models to measure media effectiveness, quantify channel ROI, optimize media budgets, and deliver strategic recommendations that improve marketing efficiency.
- **GenAI & LLM Solutions:** Built an LLM-powered multi-agent analytics assistant using LangGraph that converts natural-language questions into SQL, retrieves schema context via a RAG engine (ChromaDB, hybrid BM25 + vector search), and runs validated queries on BigQuery — enabling stakeholders to self-serve data insights without writing SQL.
- **Customer Analytics & Segmentation:** Built customer-level models including segmentation and propensity/churn analysis to identify high-value and at-risk customers, enabling targeted marketing and retention strategies over broad, untargeted outreach.
- **Analytics Workflow Ownership:** Integrated end-to-end analytical workflows, from data preprocessing to modeling and insight delivery, ensuring high-quality outputs and alignment with business objectives.
- **Bayesian MMM Development:** Developed and delivered multiple MMM solutions using Bayesian frameworks for diverse client portfolios.
- **EDA Automation & Workflow Acceleration:** Designed and deployed an automated EDA platform using Streamlit to preprocess raw datasets, generate structured Excel/PPT outputs, and automate pivots, metrics, and charts—reducing manual EDA effort by 85%.
- **Team & Client Leadership:** Led a cross-functional team of 5 analysts in delivering end-to-end Marketing Mix Modeling (MMM) and analytics solutions for clients across Retail, Healthcare, and Pharma sectors, ensuring analytical rigor, methodological consistency, and on-time, high-quality delivery. Translated complex, multi-source datasets into clear, actionable insights and presented strategic recommendations to senior stakeholders, directly influencing key business and marketing investment decisions.

TECHNICAL SKILLS

Programming & Analytics:

Python (Pandas, NumPy, Scikit-Learn, Stats models), R, SQL, Streamlit

Cloud Services:

GCP (Big Query, GCS), Databricks (Unity Catalog, Workspace, Compute, SQL Editor), Azure

Visualization & Dashboarding:

Tableau, Matplotlib, Seaborn

Version Control:

Git, GitHub

Statistical Models:

Regression & Classification Models (Linear Regression, Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, XG Boost, Correlation Analysis, Hypothesis Testing etc.), Clustering, Media Mix Modeling, Adstock (Gamma, Weibull, Geometric) Transformation, Bayesian MMM (Regression Based Attribution), Robyn, Meridian

PROJECTS

Project: Marketing Mix Modeling | Company: Dentsu

- Description: Built a Market Mix Model on pharmaceutical DTC & HCP data using gamma adstock transformation to quantify media impact and ROI. Delivered insights into optimal budget allocation and improved marketing efficiency.

Project: Multi-Agent Analytics Assistant (GenAI) | Company: Dentsu

- Description: Built a text-to-SQL multi-agent system using LangGraph with a RAG engine (ChromaDB, hybrid BM25 + vector search) on BigQuery — enabling stakeholders to get validated answers from plain-English questions without writing SQL.

Project: Customer Loyalty Model | Company: Dentsu

- Description: Built an end-to-end customer intelligence solution for a D2C retail brand's loyalty program by combining a churn prediction model and a CLV (customer lifetime value) model. Segmented customers by churn risk and predicted value into an action matrix — enabling the marketing team to shift from bulk emailing to targeted retention of high-value, at-risk customers.

Project: Automated EDA Application | Company: Dentsu

- Description: Developed a Streamlit - based automated EDA application that preprocesses raw datasets, performs data melting & transformation, and generates structured Excel and PowerPoint outputs. Enabled UI based EDA Delivery by automating pivot creation, metric aggregation, formatting and chart preparation.

Project: Trend Break Analysis | Company: Dentsu

- Description: Conducted in-depth analysis for various brands, identifying sales fluctuations and shifts in drug performance using SQL, Excel, R, and Python.

Project: Web scraping for Econometrics | Company: Dentsu

- Description: Designed and deployed a Python model with Beautiful Soup to continuously scrape and store website data in a database.

Sr. Data Analyst

Publicis Sapient

01/2020 - 09/2024

Achievements/Tasks

- **Machine Learning Model Development:** Developed and evaluated machine learning models—Random Forest, Logistic Regression, Linear Regression, and K-Means—covering the full pipeline from data preprocessing and feature engineering to hyperparameter tuning and performance evaluation.
- **Advanced Python & Statistical Modeling:** Conducted EDA, feature engineering, and statistical modeling on large datasets, developing forecasting, segmentation, and commercial analytics models for digital and retail clients.
- **MMX Data & Modeling Execution:** Built model-ready datasets through EDA and feature engineering, applied DTW clustering to optimize channel grouping, engineered adstock variables, and executed MMM model runs with full calibration and performance validation.
- **A/B testing to evaluate campaign efficiency:** Built A/B tests to assess the effectiveness of campaigns for both exposed and unexposed user groups, providing clients with insightful and clear perspectives for enhanced decision-making clarity.
- **Built robust SQL data pipeline:** to enhance marketing operations measurement consistency across campaigns.
- **Analytics Solutioning & Client Consulting:** Led technology solution initiatives, gathered and scoped client requirements, translated business needs into analytical frameworks, ensured high-quality delivery, and enabled team capability through onboarding and knowledge sharing.

Sr. Python Developer

AdGlobal360 India Private Limited

05/2019 - 12/2020

Achievements/Tasks

- **Comprehensive E-commerce Data Analysis:** Conducted in-depth analysis of e-commerce data, extracting key insights aligned with higher management's requirements, and collaborated with stakeholders to understand specific needs related to business problems.
- **Utilized Advanced Statistical Techniques:** Applied various statistical techniques, including but not limited to Linear and Logistic regression, to build models for understanding data patterns and engaging in predictive analytics.
- **Data Gathering and Preprocessing:** Collected and preprocessed raw data from various external sources using web APIs and web crawling for model development and analysis.
- **Hands-On Data Analysis with Python, and Excel:** Demonstrated proficiency in data fetching and analysis using Python, and Excel, ensuring a hands-on approach to extracting meaningful insights and supporting decision-making processes.
- **E-commerce Dashboard Creation:** Developed a Tableau dashboard to visualize sales performance, customer acquisition, and product trends, providing actionable insights for data-driven decision-making.

Performance Management Engineer

Nokia Solutions & Networks

05/2016 - 01/2019

Achievements/Tasks

- **Network KPI Improvement:** Analyzed data to enhance network KPIs, preprocessed raw data using Python, and applied models to identify features like worst cells, dropping cells, and HOSR failure cells.
- **Predictive Maintenance:** Implemented predictive maintenance models to forecast potential network issues, reducing downtime and improving overall network reliability.

RF Engineer

Idea Cellular Network Pvt. Ltd.

07/2013 - 05/2016

Achievements/Tasks

- **Wireless Network Design and Optimization:** Designed, optimized, and maintained wireless communication networks as an RF engineer.

Project: Data-Driven Marketing Campaign Optimization | Company: Publicis Sapient

- Description: Developed a Random Forest Machine Learning model to predict the future performance of marketing campaigns, enabling data-driven decisions to enhance their effectiveness.

Project: Customer Segment Analysis and Recommendation | Company: Publicis Sapient

- Description: Built a customer segmentation model using K-Means clustering on RFM features (recency, frequency, monetary) to group customers by behavior and value, enabling marketing to target each segment with tailored campaigns instead of one-size-fits-all outreach.

Project: Key Driver Analysis | Company: Publicis Sapient

- Description: Applied Key Driver Analysis using correlation and Random Forest algorithms to identify and prioritize critical dataset attributes, enabling data-driven decisions and strategic insights.

ACHIEVEMENTS

Pioneered the development of a sophisticated MMX model for national-level data by modifying the Lightweight MMM code base for adstock calculation. This enhancement improved media contribution and ROI calculation, contributing to expanded business opportunities. - **Dentsu**

Streamlined weekly reporting by automating data extraction and processing, reducing time from 2 days to a single click. - **Dentsu**

Led the development of an automation tool in Python to QC Adobe Analytics data for a client, significantly reducing manual efforts by systematically checking websites and identifying data bugs. - **Dentsu**

Engineered a web crawling solution to extract econometric variables from various websites, integrating this data into quarterly Market Mix Modeling refreshes for enhanced analytical precision. - **Dentsu**

Proposed and led the implementation of an ETL pipeline in AWS Redshift for a client, reducing data preprocessing time from 2 weeks to one day. - **Publicis Sapient**

KEY STRENGTHS

Consulting Expertise:

Offering profound knowledge and experience in providing strategic consulting services in the fmcg and pharmaceutical industry, offering specialized insights and solutions tailored to the sector's unique challenges. Proficient in steering teams towards successful outcomes by leveraging advanced analytics, machine learning, and business intelligence.

Strategic Data Leadership:

A seasoned professional with a proven track record in strategic data leadership, adept at guiding organizations through the intricate landscape of data-driven decision-making. Demonstrated ability to formulate and implement data-driven strategies that optimize processes, enhance performance, and fuel business growth.

Business Insights and Strategies:

Proven track record of providing impactful business insights and developing effective strategies, guiding clients toward optimized processes and improved performance. Demonstrated ability to conduct in-depth data analysis, exploring intricate datasets to uncover patterns, trends, and valuable information critical for decision support.

PERSONAL ATTRIBUTES

Intellectual Curiosity

Impeccable Analytical skills

Resilience and Persistence

Unwavering Professionalism

EDUCATION
